About me

I'm a self-motivated Materials Physicist interested in unraveling the role of structural defects in functional materials using advanced synchrotron techniques. Currently, I'm engaged in investigating the intricate composition-structure-property relationships on deeply embedded defects in functional antiferroelectrics and ferroelectric materials. My expertise lies in Dark Field Hard X-Ray Microscopy, X-Ray diffraction, Rietveld method, crystallography, and developing python scripts for image processing.

Academic Education

Ph.D.	Technical University of Denmark – DTU Kongens Lyngby, Denmark
2021-8/2024	Physics <i>Structure property relationship of individual types of defects in antiferroelectrics</i> Supervisors: Hugh Simons and Thomas Olsen
Interrupted 2017-2020	Federal University of ABC – UFABC Santo André, São Paulo, Brazil Nanoscience and Advanced materials <i>Physical property characterizations of Ln_2CoFeO_6 as new double perovskites</i>
MSc. 2015-2017	Federal University of Amazonas – UFAM Manaus, Amazonas, Brazil Materials science and Engineering <i>Structural metastability of Ni-Ti-Ge system induced by mechanical alloying</i>
BSc. 2010-2015	Amazonas State University – UEA Manaus, Amazonas, Brazil Mechanical Engineering
